

HOW TO MANUALLY ACCEPT PRODUCT

- Log into InfiniTrak
- Go to 'View New & Pending Transactions'
- Locate and open the transaction for the shipment you are receiving.

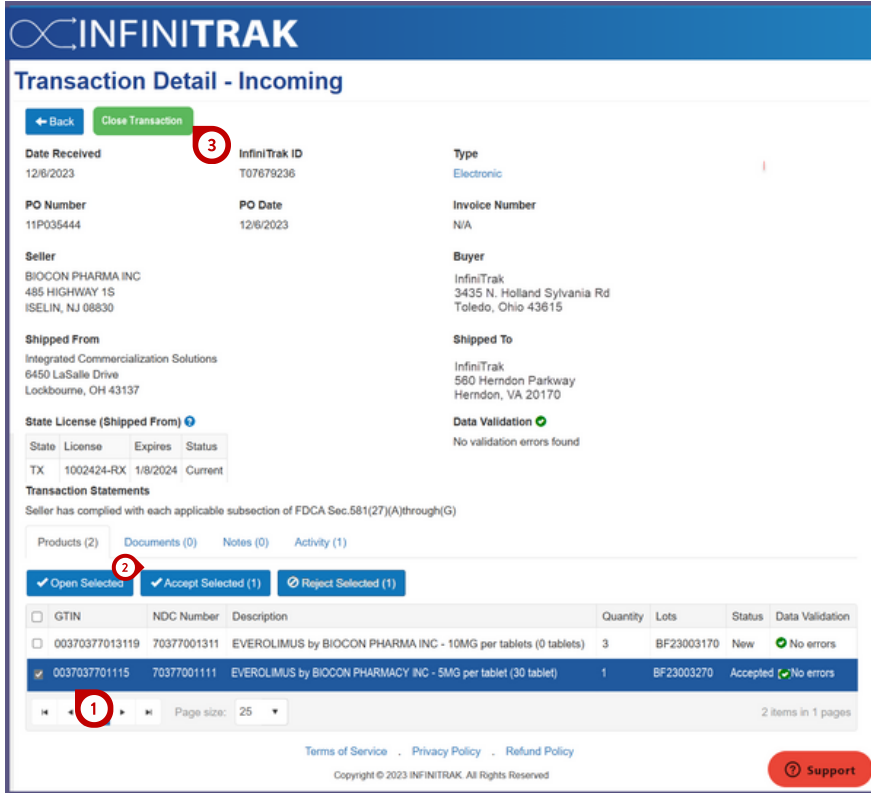

- Verify the shipping information.
- Check the license verification.
- Match each product received to the product data on the transaction by selecting the product and 'Open Selected'.
- From the Product Detail page, verify serial number, lot, & expiration date.

Select 'Open' to view the product detail page.

- Once the product has been matched to the data, return to the Transaction Detail page and select 'Accept Selected'
- Repeat these steps until all products have been reconciled with the transaction data.
- Last, at the top of the page, select 'Close Transaction'

The pharmacy has the option to mass accept products at the transaction level and at the product level. Each table has a box in the top left that allows you to 'Select All' and 'Accept'. This is not recommended because it does not verify the data received matches the product received, it only verifies that you received a transaction.
